Basic information about the drug AlecnibDescriptionOrder, delivery and payment Alecnib?

Buy Alecnib

Alecnib tablets from the Bangladeshi manufacturer Everest Pharmaceuticals Ltd. are prescribed for adult patients with anaplastic lymphoma and non-small cell lung cancer. The drug is recommended to combat severe stages of the disease and in cases where surgery has not yielded results. After consulting with your doctor, you can buy Aleknib inexpensively at the Pharmacy.

Aleknib's price

Everest Pharmaceuticals Ltd from Bangladesh manufactures alectinib-containing drug - Alecnib under a license from WHO. The original product is "Alesensa", developed by the pharmacologists of the Japanese company Chugai PharmaceuticalCo. The original has been

thoroughly studied, which allows the Bangladeshi manufacturer not to conduct clinical trials, since Aleknib is fully consistent with Alesens' drug. This affects the price of the drug, making it affordable for most patients. The cost of a drug in an online pharmacy is affected by a direct supply agreement with a Bangladeshi manufacturer.

Reviews about Alecnib

Studies of the original drug have shown that the active agent of the drug, alectinib, has an inhibitory effect on the receptors of tyrosine kinase targeted to ALK and RET, reducing the growth of cancer. In addition, Alecnib affects the body's defenses by triggering the immune system. Aleknib is approved by Russian oncologists and is actively prescribed for the treatment of oncological diseases.

Description Alecnib

Each bottle of Alecnib contains 56 tablets, each of which contains 150 mg of alectinib, which acts on the growth of tumors by blocking the multiplication of malignant cells. The drug is processed during the day and excreted by the kidneys and intestines.

Indications and methods of application

Alecnib tablets are used as a primary or additional agent in the treatment of oncological diseases of the circulatory and respiratory systems. The course provides for two doses of the drug. According to the instructions, 4 capsules with one dose of alectinib each are taken twice a day. The daily dose is 1200 mg of alectinib; in exceptional cases, the treating oncologist may revise the dosage of the medication.

Contraindications Alecnib

Alecnib is not recommended for use in case of individual intolerance to alectinib, in case of malfunctioning of the liver and kidneys, as well as in children under 18 years of age.
