Basic information Description Order, delivery and payment

Where to buy Entavir 0.5?

Entavir 0.5 is an antiviral drug of our time, which was created in India by a well-known pharmaceutical company called Cipla. The drug was developed on the basis of entecavir, which has long been recognized as one of the main in the fight against the hepatitis B virus. Order the drug in our online pharmacy in just a couple of minutes. Please note that such medications cannot be taken on your own, but only as directed by your attending physician who monitors the course of your therapy.

Prices for ENTAVIR 0.5

Since ENTAVIR 0.5 is a modern generic drug, its price is therefore significantly lower than that of the original Baraklud drug. In our Pharmacy, you can purchase any medicine you need directly from the supplier, without overpayments. A lot of expensive studies have not been carried out on the ENTAVIR 0.5 preparation, since it has long been known that the active substance, Entecavir, has already proven its effectiveness in practice. Order ENTAVIR 0.5 at a bargain price today and you will not regret it.

Original drug

The original drug, like all its generics, is prescribed for the treatment of hepatitis B, as well as for histological signs of liver inflammation. It is used for a course of therapy in adults, as well as contraindicated for use in children under the age of 18. After long-term therapy with Baraclud, patients note that their condition improves significantly, and liver function resumes. Its active substance is Entecavir.

Description ENTAVIR 0.5

Release form ENTAVIR 0.5 - tablets. In a cardboard packaging box, on which the company logo is printed, there are 10 film-coated tablets, each of which contains 0.5 mg of the active substance entecavir.

Indications

Appointed for a long period, the minimum period of which is a year. It is intended for the treatment of hepatitis B and the restoration of the natural functioning of the liver in patients.

Contraindications Entavir 0.5

Not to be taken by people under the age of 18. It is not allowed to prescribe to women who are breastfeeding and to patients who have an individual intolerance to certain components of the drug.
