Buy drug Evertor

The online pharmacy offers an innovative drug "Evertor" from the Indian company Biocon. This drug is used to treat breast tumors, neuroendocrine and renal cell carcinomas. Before using the drug, it is necessary to consult with your doctor, as self-medication can cause irreparable harm to the body.

Evertor price

The price for Evertor is significantly lower than the analogs used. The online pharmacy offers its customers the most advantageous offer, as it purchases the drug directly from the manufacturer Biocon.

Reviews about the drug Evertor

The drug has passed a full cycle of clinical trials and received international certificates and quality licenses. The tests revealed the selective effect of the drug on cells with abnormalities in the genetic code, limiting their reproduction. This effect makes it possible to achieve rapid remission in cancer patients. After using the course, the patients noted a rapid improvement in their well-being, and the treatment process itself was distinguished by ease and with a minimum number of side effects.

Evertor

The online pharmacy offers its customers the drug "Evertor", which contains 30 capsules per pack. The active ingredient is everolimus. The drug is used as directed by a doctor with an antitumor effect.

The online pharmacy carries out direct deliveries from the manufacturer - the Indian company Biocon. This guarantees the high quality of the drug at the most affordable price. After the drug arrives at the warehouse of the pharmacy, it is sent to the client, in strict accordance with the requirements for the transportation of vital drugs.

The action of the drug

The drug inhibits and slows down the growth and proliferation of cancer cells. This effect makes the drug necessary for patients with pronounced and metastatic renal cell oncological diseases. This progress is confirmed by clinical studies, which show no further progress of the disease within six months.

Application of the drug

The drug is taken in strict accordance with the prescription of the attending physician, every day at regular intervals. The dosage of the drug is prescribed by the attending physician, and its change is highly undesirable. The positive effect is achieved by long-term use of the drug with a cumulative effect.

results

"Evertor" is one of the most effective drugs with a high patient survival rate.

Contraindications and side effects

The use of the drug is prohibited for persons under 18 years of age, pregnant women and women during lactation, as well as those who have been diagnosed with allergic reactions to the components of the drug, as well as persons with impaired kidney and liver function.

Ordering a drug

The drug "Evertor" can be ordered on the website of the online pharmacy by calling the hotline or filling out the delivery form. Before purchasing, customers will be consulted by a qualified doctor who will tell you about the benefits of the drug, as well as the ways to use it.

Delivery

In Moscow, St. Petersburg or Krasnodar, delivery is carried out by our own courier service, within 1 day, after placing the order. In other cities of Russia, the drug is supplied by the forces and means of the Russian Post or the EMS courier service. In this case, the delivery time is 7 to 10 days.
