Buy TENOHET-EM

The drug "TENOCHET-EM" is the most modern drug recommended for use against HIV infections. The drug is manufactured in India. It contains: emtricitabine and tenofovir alafenomide. You can order this drug after consulting your online doctor in our pharmacy.

TENOHET-EM price

The drug "TENOCHET-EM" is licensed and absolutely does not differ from the original antiviral agent. Both drugs have exactly the same composition: emtricitabine and tenofovir alafenomide. The only difference is the price of the product. Our pharmacy works directly with Indian manufacturers, and that is why the cost of the "TENOCHET-EM" product is lower. So everyone can get the drug quickly and inexpensively.

Reviews TENOCHET-EM

Generic "TENOHET-EM" has the same effect as the original. The drug effectively fights HIV infection. However, you should be careful when using the product at the same time as other drugs, because this can affect the quality of treatment. Therefore, the treatment plan should be strictly followed.

"TENOHET-EM" is a modern antiviral agent for the fight against HIV infections. The patient is advised to take one tablet once a day. The dosage for tenofovir alafenamide is 25 mg. Usually "TENOHET-EM" is prescribed in combination with other drugs like HAART.

Compound

The main components are emtricitabine and tenofovir alafenomide.

Indications for use, features of the TENOCHET-EM mode

The drug must be used strictly following the treatment plan. Usually "TENOHET-EM" is recommended to take one tablet once a day, either with meals or on an empty stomach.

If the patient has forgotten to take the medication, then a double dose should not be taken. In the best case, skip the pill, and then try to strictly follow the admission schedule.

The drug is used to reduce the number of viral particles. In combination with other retroviral drugs, the patient's body can keep the number of viral particles to a minimum. They also prevent the transmission of HIV to others.

Side effects of TENOCHET-EM

Before using, be sure to consult with a specialist, because absolutely any remedy can cause side effects. If during use you find any side symptoms, it is also recommended to consult a doctor. A complete list of side effects is located in the instructions for use of "TENOHET-EM". The most common of these are nausea, headache, gas, diarrhea, fatigue, and so on. When prescribing medications, it is necessary to inform the doctor about all medications used. Indeed, with the simultaneous use of drugs, the effectiveness of the therapeutic action of each of them may decrease.

TENOCHET-EM during pregnancy

Consultation with a doctor is necessary, and especially if the patient is a planning child, pregnant or breastfeeding woman. It is recommended to refrain from breastfeeding for women with HIV infection, because the infection can pass to the baby. Also, the components of the drug can pass into breast milk.
